## Photo contest rules:

### Categories 1, 2 & 3 Eligible Photographs

Normal processing of the original file is acceptable. That includes:

- cropping
- minor adjustments to color, white balance, tone, lighting levels and curves, shadows and highlights, saturation, contrast, sharpness
- moderate dodging and burning
- removal of dust spots and moderate reduction of image noise.

Photographs that have been digitally or otherwise altered beyond standard optimization can be entered in the Altered Reality category 4.

### Category 4 Eligible Photographs

That includes:

- images that display a change in natural color, form, shape or any combination of these that deny the photographic process.
- images that have been enhanced, reduced, or transformed beyond the way the subjects appear in nature
- HDR frame stacking
- stitched panoramas

- images that have been manipulated by the addition, removal, or alteration (painting over, cloning, or blurring) of anything in the original subject and scene that were photographed
- added borders or filter applications
- changes in color so significant that the processed colors are widely different from the original colors
- changes in density, contrast, color and/or saturation levels and dodging and burning that significantly alter the image by obscuring or eliminating information in the picture

You may be required to provide CCCC with original image files (RAW, jpg, etc.) in the timeframe provided upon request (generally within 7 days).
